NOTE 1: Water sampling prices given here are for individual "owner-requested" sampling. Newly installed/repaired wells require a "New Well Test Kit" from the NC State Lab of Public Health (cost to county \$70 per kit) which is already included in our Well Permit Fee. NOTE 2: Craven County does not allow CA to be applied for at same time as IP because, if IP is denied, folks want their CA money refunded. We allow application for a CA only after issuance of an IP. NOTE 3: A copy of our full fee schedule is included as another attachment, in case clarification is needed.

end of survey																

Instructions: Please review the gray shaded area with 2008 data. This is the information that is needed for the dataset. Complete the purple shaded area with your 2010 EH fee/charges/costs. For example, if the standard charge for a individual septic permit is \$100 per bedroom, then complete the charge/cost for the respective bedrooms, ie. 2 bedroom = \$200. If there is no charge, please indicate by N/C. If left blank, please explain. Do not add colums- add only rows as this make it much easier to compile. Once complete, save to file and then email to: tobin@tnhs.net

Thank you for your help. All results will be compiled and posted at: <http://www.ncehsa.org> --links webpage
