

# National experts will present about PFAS, including their impacts to the environment and human health.

- Date:** Friday, June 21, 2019
- Time:** 8:00 a.m. - 5 p.m.
- Location:** McKimmon Conference and Training [Center](#)  
NC State University Campus  
1101 Gorman St. Raleigh, NC 27606  
FREE parking
- Registration:** No registration fee for state, county or government staff  
Industry/Consultants: \$200 per person  
(Limited spaces available)  
To register visit the ITRC website at:  
<https://www.itrcweb.org/Training/Pfas>

Per- and polyfluoroalkyl substances ([PFAS](#)) are a complex family of more than 3,000 manmade chemicals, including GenX. These chemicals are widely used around the world in water-resistant clothing, food packaging, nonstick cookware and firefighting foam. Because of their extensive use, PFAS can be found in people, wildlife and fish.

Meeting will feature expert discussions with Interstate Technology and Regulatory Council ([ITRC](#)) members from across the U.S. Proposed meeting topics include:

- Sources of PFAS;
- Regulations;
- New sampling and analysis technology;
- How PFAS chemicals get into the air, water and soil (fate and transport);
- Toxicity of PFAS and how they can affect human health and the environment;
- Current and promising technologies to reduce PFAS in the environment;
- Significant sources of PFAS (Firefighting foam); and
- Risk communication strategies on how to talk about PFAS with the public.

## Who should attend?

Environmental and health staff at the state and local level, tribe representatives, and local government representatives are encouraged to attend the meeting.
